Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 26-36, 46 and 54-66, drawn to a system and method for searching media content based on search criteria, classified in class 709, subclass 226.
 - II. Claims 17-25, 39-45 and 48-49, drawn to a system and method for multimedia content accessing, classified in class 709, subclass 203.
 - III. Claims 15-16, 37-38, 47 and 50-53, drawn to a system and method for forming searching list, classified in class 707, subclass 3.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, invention I is directed to a method comprises the steps of applying the search criteria to rank list to find the media content. The invention II is

Art Unit: 2154

directed to a method comprises interfacing an application to enable the subscriber to access the multimedia content. The invention II is directed to a method comprises interfacing an application to enable the subscriber to access the multimedia content. The invention III is directed to a method comprises the steps of forming a list of network identified bookmark.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-16, 26-36, 46 and 54-66) would require use of search **Class 709, subclass 226**.

(b) the Group II search (claims 17-25, 39-45 and 48-49) would require use of search **Class 709, subclass 203**.

(c) the Group III search (claims 15-16, 37-38, 47 and 50-53) would require use of search **Class 707, subclass 3**.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected

Art Unit: 2154

invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is reminded that the required for response to this requirement is 30 days, not one month.
